It is our attention to detail that makes our instruments distinctive. We apply the same attention to detail when customising instruments to suit your needs. NJ Phillips has a long history of working with companies around the world to develop new application systems or customise equipment from our existing range. Talk to our Marketing Department or Research and Technical Team about your customising needs on +61 2 4340 2044 or email njp1@njphillips.com.au

Experience the benefits of our Powered range of instruments – precise product delivery, effortless trigger application and portable capabilities.

**GREEN INDUSTRY PRODUCT GUIDE**

Application Equipment for Forestry, Horticulture, Agriculture, Arborists and Weed Control.

Our portable application systems give you flexibility to deliver product in densely populated areas.

*All items shown are with Australian Air or Gas fittings.*
